

Linking Outcomes to Assignments in Canvas, Part II

This Tech Tip will describe how to get data about the outcomes you've created and linked to assignments in Canvas.

In order to see the results for both the class and individual students, you need to go to **Settings** in the main menu on the left hand of the screen and click on **Feature Options** tab at the top of the screen:

The default is for the **Learning Mastery Gradebook** and the **Student Learning Mastery Gradebook** to be in the “off” position. Click on both of those to activate those features in your gradebook and in the students' gradebooks.

Once you've turned on the **Learning Mastery Gradebook**, you will see something new in your gradebook screen.

Grades Learning Mastery

Filter by student name or secondary ID

Next to **Grades** will now appear “**Learning Mastery**” – click on that and a new grading report will appear.

Grades Learning Mastery

Course average ▾	0.83 /1	■
Learning Outcome	Suffrage	Women's Movem...

You will get a class list that shows how each student is doing on each outcome being assessed. At the top of the screen, you will also get an overall class average for each outcome. This will be useful when you have to input student learning outcome data in Curricunet.

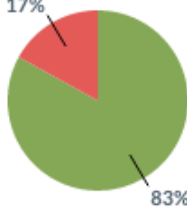

When you click on **Course Average**, a drop down menu appears allowing you to switch over to **Course Mean**.

When you scroll over the outcome itself, a pie chart appears that includes the outcome description, the calculation method and how the class did on the particular outcome, as in the example below:

Course average ▾ 0.83 / 1 ■

Learning Outcome Suffrage Women's Movem...

Women's Movement Accomplishments

17%
83%

- Meets Expectations
- Does Not Meet Expectations

Mastery set at: 1

Students will be able to analyze primary sources of the women's rights movement of the 1960s and 1970s, identifying major themes of the movement.

Calculation Meth...	Highest Score
Example:	Mastery score reflects the highest score of a graded assignment or quiz.
1- Item scores:	1, 4, 2, 3
2- Final score:	4

To get an Excel report of outcomes, click on **Individual View** on the top right side of the **Gradebook** screen.

You can generate reports on Assignments as well here but click on **Learning Mastery** at the top of the screen.

Select the outcome you want a report on then click on **Download Results**. This generates an Excel spreadsheet with each individual student's assessment data.

Gradebook: Individual View

Note: Grades and notes will be saved automatically after moving out of the field.
