

Canvas Quick Tip #2 – How to Set up a Graded Survey and Give Extra Credit!

Go to Quizzes and hit

Set up the survey directions and title just like a quiz.

Under Quiz Type, choose GRADED survey.

Under **Score**, choose less than a point (much like you did in Etudes to set up extra credit assignments).

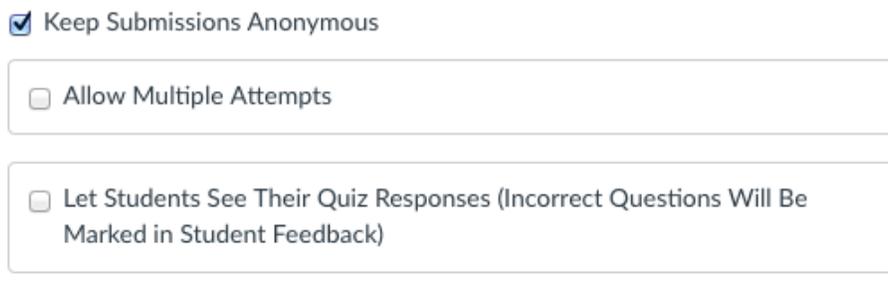

Score pts

students will automatically receive full credit once they take the survey

Once students complete the survey and submit it, that .01 points will appear in the Gradebook.

Click on “**Keep Submissions Anonymous**” but don’t click on “Let Students See Their Quiz Responses”. Because it is a graded survey, when you are creating questions, Canvas will insist that you choose an answer for each question. Annoying. What that means is that some students will have their responses marked as “incorrect” which doesn’t make sense when you are asking them for feedback. They aren’t going to go back to look at their responses anyway!

Keep Submissions Anonymous

Allow Multiple Attempts

Let Students See Their Quiz Responses (Incorrect Questions Will Be Marked in Student Feedback)

Set up the rest of the survey as you would any quiz. I recommend “muting” the assignment as well – when the students complete the survey, it will immediately show the very small amount attached to the assignment in the Gradebook. Then you will get the student messages about “where are my extra credit points!!” Mute the survey until you have time to get into the Gradebook and change the grades.

 **First Survey/Extra Credit!**
Out of 0.01 

-

Once the survey is set up, you will see this in the upper right hand corner of the assignment page:

 [Survey Statistics](#)

 [Moderate This Survey](#)

 [SpeedGrader™](#)

If you go into Speedgrader, for the students who have submitted this is what you will see:

The screenshot shows the Speedgrader interface for a student's submission. The top navigation bar includes the course name 'First Survey/Extra Credit', the date 'Due: Sep 20 at 11:59pm', and the assignment ID 'Fx18 H1ST 027 64892'. The student's progress is shown as '2/72 Graded' and '0.01 / 0.01 (100%) Average'. The student's name is 'Student 34'. The main content area displays the message: 'This student has submitted the assignment. This student's responses are hidden because this assignment is anonymous.' On the right side, there is a sidebar with the submission date 'Submitted: Sep 17 at 1:06pm', the assessment grade 'Grade out of 0.01' with a value of '0.01', and an 'Assignment Comments' section with a text input field and a 'Submit' button. A 'Download Submission Comments' link is also present.

You cannot override the grade in Speedgrader – won't let you do it. You have to override the grade in the Gradebook.

If you click on Survey Statistics, it will break down the numbers for you for the overall survey and for the individual questions. This works best with true/false or multiple choice questions. Written responses will not be shown in this report.

Here's a sample from one question on a recent survey:

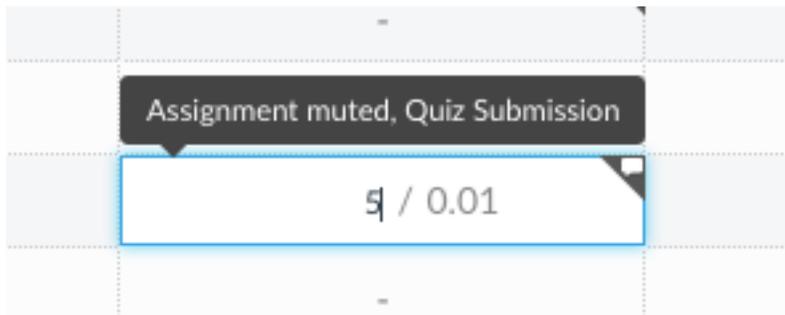

The screenshot shows a survey question in Speedgrader. The question is 'The course is well organized and easy to navigate.' The student's score is '-0.00' and the Discrimination Index is '?'. The question has been attempted 2 out of 2 times. The response statistics are as follows:

Response	Number of Respondents	Percentage
Yes I have had no problem finding what I needed in the class	2	100%
No, I'm still having trouble figuring out how the class is organized	0	0%
It could go either way	0	0%

A green bar chart shows 100% for the first response, and a green circle with a checkmark indicates '100% answered correctly'.

One Way to Give Extra Credit in Canvas

Go to Gradebook. For each student who has submitted the extra credit assignment, the low point value will appear. Click on the low point score and type in the number of extra credit points.

You will get a bright orange warning, “This student was just awarded an unusually high grade”. You will get that warning every time you override the low point value in the Gradebook.

Once you have updated the scores, then unmute the assignment.
